

IoT Custom Business Case Analysis

Use Wireless 20/20's WIROI IoT Business Case Tool

Develop detailed business case to validate economic viability and maximize profit for your IoT project

Build a custom version of the WIROI IoT Business Case tool for your project:

- Supports a wide range of IoT Use Cases fitting in 3 categories (sensor networks, asset tracking, operational IoT networks)
- Estimate the CapEx cost to deploy the network.
- Estimate the on going OpEx costs to run the network
- Test technical tradeoffs for their impact on the business case
- Evaluate the revenue and cost savings delivered by the project
- Resulting business case will help to gain investment and green light your project.

- Offered in partnership with Deutsche Telekom IoT
